

**A universal transmitter
compatible with all
Honeywell Analytics gas
sensor technologies**

XNX Universal Transmitter

Flexible

- Compatible with all Honeywell Analytics gas sensors
- Allows selection of best sensor technology for each application
- Choice of all industry standard output signals
- Ability to adapt configuration as site needs change
- Future-proofed for any new output standards

Common Transmitter Platform

- Simplified and reduced cost of installation
- Reduced training time and cost
- Less chance of misinterpreting messages
- Less chance of incorrectly changing settings
- Reduced maintenance, spares, stock and cost

Global Approvals

- European, US and Canadian
- Compliant with ATEX, UL and CSA standards
- ATEX, UL and CSA performance approval (Pending)
- IEC61508 SIL 2 (Pending)

Easy to Use

- Easy read multilingual backlit LCD with text, bar graph, digits and icons
- Local or remote sensor mounting options
- Selectable sink, source or isolated 4-20mA output to suit preferred wiring topology
- HART® communications as standard for remote diagnostics/configuration

Reduced Operational Costs

- Fully configurable via non-intrusive magnetic switches
- No hot work permit needed
- Hot swap toxic and Oxygen sensor cartridges
- Serviceable catalytic and IR sensors
- Auto-inhibit during maintenance

Friendly Installation

- Integral surface mounting lugs or optional pipe or ceiling mounting brackets
- 5 x M25 or ¾" NPT cable/conduit/sensor entries
- Plug-in 'POD' module removes to give access to terminal area
- Removable plug/socket type terminal blocks for ease of wiring

Typical Applications

- Offshore oil and production platforms
- Oil and gas exploration and drilling
- Refineries
- Chemical and petrochemical plants
- Onshore oil and gas terminals
- Gas transmission
- Power stations

XNX is an extremely flexible transmitter that can be configured to accept an input from any of the Honeywell Analytics range of gas sensor technologies. It can also be configured to provide a wide variety of industry standard output signals. This enables users to have a single type of interface to all their gas detection needs, even when different types of detectors are employed, to most effectively address the different gas detection applications on site.

The most effective gas detection systems often employ a variety of detection technologies including point flammable detectors (both catalytic and infrared type), toxic and Oxygen electrochemical cell type detectors and open path infrared detectors. XNX provides a common transmitter interface to all of these and can be configured to provide industry standard signal outputs to match the individual requirement of each application or the preferred site standard. If site output standards change, XNX can be reconfigured to provide the new required output. XNX has also been future-proofed by having the ability to have other output modules fitted as new output standards are developed and adopted by industry.

Having a common transmitter platform for all your gas detectors brings further benefits. Common tools and installation methods simplifies and reduces cost of installation. The common user interface makes operation faster to learn and easier to navigate, thus reducing time needed for training as well as reducing the chance of incorrectly interpreting messages or incorrectly changing settings. Common spare parts also mean reduced maintenance spares stock levels and cost for all detectors.

XNX allows you to apply the most appropriate gas detection technologies for each application, standardise the interface to those detectors and has the flexibility to provide the required signal outputs. With XNX the answer is always yes.

XNX Universal Transmitter

XNX Transmitter

XNX has Worldwide hazardous area and performance approvals and is housed in a flameproof enclosure that is available in either painted marine grade aluminium LM25 or stainless steel 316 versions. A large backlit multilingual LCD clearly indicates the unit's status using a combination of text, digits and icons. Users can modify its operation using the LCD and magnet switches without ever needing to open the unit. An optional local IS HART® terminal port is also available. Both enable one man, non-intrusive, operation and reduce routine maintenance time and costs. Local LEDs are also provided to indicate the unit's status at a glance.

XNX Transmitter Sensor Compatibility

XNX is compatible with all of the Honeywell Analytics range of industrial fixed gas sensors including Searchline Excel, Searchpoint Optima Plus, Sensepoint (HT and PPM) and Model 705. For further information on these sensors, please refer to their individual datasheets.

XNX with Searchpoint Optima Plus

XNX MPD Sensor

XNX EC Sensor

There are also two new sensors available with XNX. The new Multi Purpose Detector (MPD) is a serviceable stainless steel sensor housing with plug-in catalytic and infrared sensor cartridges. The catalytic sensors measure flammable gases in the range 0-100%LEL and the infrared sensors measure Hydrocarbons in the range 0-100%LEL, or Methane 0-100%LEL (or 0-5%Vol) and CO₂ 0-5%Vol. See the specifications section for full details of the MPD sensor.

The new XNX EC sensor is also a serviceable stainless steel sensor with a wide range of toxic and Oxygen plug-in sensor cartridges. The XNX EC sensor interface to the XNX transmitter is intrinsically safe, allowing the sensors to be 'hot swapped' without the need for a hot work permit. This reduces the cost of ownership by reducing the cost and time to service the detector.

XNX Universal Transmitter

XNX Transmitter Configuration

XNX has three basic personalities (configurations) which support different types of sensor. The personality boards and optional output interfaces are enclosed in the electronics POD (Personality, Options and Display). The POD determines the XNX transmitter behaviour based on the sensor type attached to it and the selected output options.

The mV (millivolt) personality is used for all mV signal input sensors including MPD, Sensepoint HT, PPM and the Model 705. The EC (Electrochemical cell) personality is for use with the XNX EC toxic and Oxygen sensors. The IR (infrared) personality is for use with the Searchline Excel and open path Searchpoint Optima Plus point infrared gas detectors.

The table below shows the three basic XNX transmitter configurations and the sensors each supports.

XNX Transmitter Main Components

Personality	XNX mV					XNX EC	XNX IR	
Sensors Supported	MPD Flammable Catalytic	MPD Flammable Infrared (Flam and CO ₂)	Sensepoint HT (High Temperature)	Sensepoint PPM	Model 705 HT (High Temperature)	XNX Toxic and Oxygen Sensors	Searchpoint Optima Plus	Searchline Excel

Ceiling Mount

Surface Mounted

Duct Mounted

Optional remote sensor
mounting kit for XNX EC
sensor

Installation

Outline Installation Dimensions

XNX has two integral mounting lugs on the transmitter body. The transmitter may be fixed directly to a surface, or to a horizontal or vertical pipe/structure, $\varnothing 100\text{-}150\text{mm}$ ($\varnothing 4$ to $6''$) using a U bolt and pipe mounting bracket. Below are surface mounted outline installation dimensions for the different XNX configurations.

Note: All dimensions are typical and are in millimeters. There are small differences in size between the aluminium version (shown) and stainless steel version. This does not effect the location of the mounting holes.

Installation

Outline Installation Dimensions

XNX with Remote Sensepoint HT and Feel Junction Box

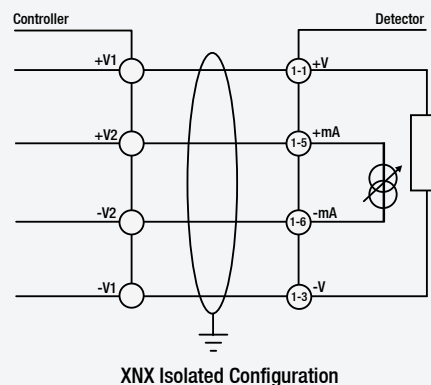

XNX with Remote Sensepoint Model 705 HT and Junction Box

Wiring Schematics

The XNX transmitter may be configured current source, sink or isolated. These options are offered to allow greater flexibility in the type of control system that it can be used with. Source/sink/isolated is selectable via the switch located on the back side of the POD.

Note: Terminate cable screen at the detector or the controller, not both.

Electrical

Electrical

XNX is designed for use in potentially explosive atmospheres. As such, installation should follow national guidelines using suitable mechanically protected cable and glands (M25 or ¾" NPT) or conduit. Use 0.5mm² (20AWG) to 2.5mm² (~13AWG) cross sectional area cable as needed to ensure minimum operating voltage at the detector, depending on installed cable length. Five M25 (ATEX/IECEx certified version) or ¾"NPT entries (UL/CSA version) are provided. Entries are also used for either locally mounting a sensor or for accepting the cable/conduit from a remotely mounted sensor.

Typical Maximum Cable Lengths

The maximum cable length between a controller and detector is dependent upon:

- The minimum guaranteed supply voltage from the controller
- The minimum operating voltage of the detector
- The maximum current draw of the detector
- The input impedance of the controller
- The resistance of the cable

The typical maximum cable length table (right) is for an XNX mV with an MPD catalytic sensor or an XNX EC with an XNX EC sensor fitted. It also assumes a single transmitter being powered from a PSU. Refer to the manual for examples of other variants and cable topology.

Cable Size	Max Cable Distance Meters (Feet)
1.0mm ² (18AWG*)	347m (1140')
1.5mm ² (16AWG*)	551m (1810')
2.0mm ² (14 AWG*)	880m (2890')
2.5mm ² (12AWG*)	1408m (4620')

*nearest equivalent

Terminals on POD Module

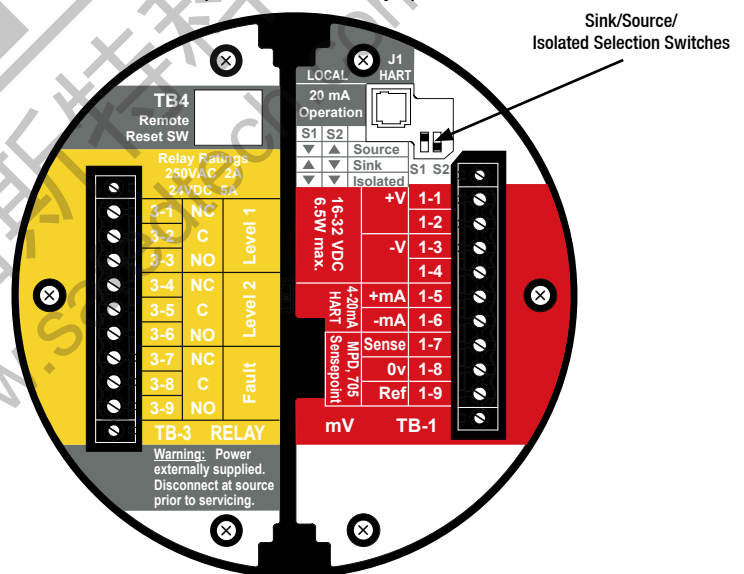

All sensor connections and option module connections are made at the terminal blocks mounted on the rear of the removable POD module.

The terminals provided are dependent on which of the three basic personalities have been selected plus the options selected.

The tables below show the different terminal connections for each of the available POD personality boards and options boards.

	S1	S2
Source	Down	Up
Sink	UP	Down
Isolated	Down	Down

Technical Summary

XNX Transmitter		
Use	High specification universal transmitter for use with a wide range of Honeywell Analytics local or remote gas detectors for the detection of flammable, toxic and Oxygen gas hazards. Suitable for use in Zone 1 and 2 hazardous areas, and North American Class I and II Division 1 or 2 areas.	
Construction		
Material	Housing: 5-coat marine finish painted aluminium alloy LM25 or 316 stainless steel	
Weight (Approx.)	Aluminium alloy LM25 : 2.8kg (6.2lbs). 316 stainless steel: 5kg (11lbs)	
Mounting	Surface mount via integral mounting lugs. Optional pipe mounting kit suitable for Ø100mm to 150mm (Ø4" to 6") pipe. Optional ceiling mounting bracket	
Entries	5 conduit/cable entries (2 right, 2 left, 1 bottom). Entry size M25 for ATEX/IECEX versions or ¾"NPT for UL/CSA certified versions	
Dimensions	160mm x 197mm x 114mm (6.1" x 7.8" x 4.5")	
Environmental		
IP Rating	IP66 in accordance with EN60529:1992. NEMA 4X	
Operating Temperature	-40°C to +65°C (-40°F to +149°F)	
Operating Humidity	0-99%RH (non condensing)	
Operating Pressure	90-110kPa	
Storage Conditions	-40°C to 75°C (-40°F to 167°F), 0-99% non-condensing	
Electrical		
Input Voltage Range	EC and mV versions 16-32Vdc, IR version 18 to 32 Vdc (24Vdc nominal)	
Max Power Consumption	XNX EC (Toxic): 6.2 watts XNX mV (Catalytic or IR cell): 6.5 watts XNX IR with Searchpoint Optima Plus: 9.7 watts XNX IR with Searchline Excel Receiver: 13.2 watts	
Current Output	Fully configurable isolated 4-20mA & HART® output module providing current sink, current source and isolated modes of operation (supports HART® 6.0 protocol) supplied as standard Default current output settings: ≥0.0<1.0mA 4.0 mA to 20.0mA 2.0 mA or 4.0 mA (17.4mA) The available output range for Inhibit, Warning, Beam Blocked and Low Signal is from 1 to 4mA. For an over range condition, the range is 20 to 22mA	
4-20mA Signal Accuracy	+/-1% Full Scale	
Functions Supported by HART®	Gas reading Gas name and units of measurement 4-20mA signal level General/device information Installation Configuration Forcing of 4-20mA output	Detailed sensor information including: Optical signal level Dynamic reserve (Searchline Excel only) Raw reading 24V supply voltage Temperature RTC (Searchline Excel only) Calibration and configuration status Detailed fault and warning information Fault and alarm history Zero calibration
Terminals	Cage style pluggable with retaining screws for wire diameter 0.5mm² to 2.5mm² (approx. 20AWG to 14AWG)	
Certification		
European	ATEX: II 2 (1) G Ex d [Ia IIC] IIB + H2 T4	
International	IECEX: Ex d [Ia IIC Ga] IIB T4 Gb IP66	
North American	UL: Class I, Div 1, Groups B, C, and D / Class 1, Zone 1 AEx d IIC T5 (T _{amb} -40°C to +65°C)	
Canadian	CSA: Class I, Div 1, Groups B, C, and D T5 (T _{amb} -40°C to +65°C)	
EMC	CE: EN50270:2006 EN61000-6-4:2007	
Performance	Europe – ATEX, EN45544, EN50104, EN50270, EN50271, EN13980, EN60079 (ATEX performance approval pending) North America – UL 913, UL 1203, CSA 22.2 No. 152 IEC61508 (SIL Assessment, SIL 2), IECEx OD 005 (Pending)	
Local IS HART® Port (Optional)		
Description	Provides externally accessible IS connections to the XNX transmitter to enable 'hot' connection of HC275/375 HART® or equivalent hand held configurator	
Installation	Fitted to one of the cable entries on the XNX transmitter. Option can be factory fitted or in the field by a qualified service engineer	
Environmental Protection	Port protected by cover to IP66/67 when not in use	
Relay Module (Optional)		
Description	Provides three fully user configurable relay outputs that can be switched based on the current gas level and/or status of the transmitter. Provides 2 x SPCO alarm and 1 x SPCO fault relay. Mutually exclusive with Modbus® and/or Fieldbus™ options	
Rating	Maximum: 240VAC, 5A (non inductive load) Minimum: 5V, 10mA (non inductive load)	
Installation	Option can be factory installed in display module or in the field by a qualified service engineer	

Technical Summary

Foundation Fieldbus™ Module (Optional) - Pending

Description	Foundation Fieldbus™ output for connection to a multi-drop H1 network. Mutually exclusive with relays and/or Modbus® options		
Installation	Option can be factory installed in display module or in the field by a qualified service engineer		
Connections	Sig+, Sig- and Screen		
Physical Layer	Conforms to IEC 1158-2 and ISA 50.02, 31.25Kbits/s		
Maximum No. of Nodes	32		
Functions Supported	Gas reading Gas name and units of measurement Instrument status (OK, warning, fault, over-range) General/Device Information Remote zero and span calibration (detector dependent)	Detailed sensor information Including: Optical Signal Level Dynamic reserve (Searchline Excel only) Raw reading 24V supply voltage Temperature RTC (Searchline Excel only) Calibration and configuration status	Detailed Fault and Warning Information: Fault and alarm history Zero calibration

Modbus® RTU Module (Optional)

Description	The Modbus® output module provides an isolated RS485 output to enable the connection of the XNX transmitter to a multi-drop Modbus® network. Mutually exclusive with relays and/or Fieldbus™ options		
Installation	Option factory installed in display module or in the field by a qualified service engineer		
Connections	RS485+, RS485-, Drain		
Physical Layer	Isolated RS485, 1200 to 19.2K baud		
Maximum No. of Nodes	254 XNX compatible transmitters only		
Protocol	Modbus® RTU		
Functions Supported	As per Foundation Fieldbus™ Module (Optional) - see above

NOTES

Data taken at ambient conditions of 20°C, 50% RH. Data represents typical values of freshly calibrated sensors without optional accessories attached. *Accuracy at 10% of default full scale (typical A1 alarm) of applied gas, or minimum (whichever is greater). Measured using calibration flow housing at calibration flow rate. Performance figures are applicable between 10 and 90% of full scale. Performance figures are measured by test units calibrated at 50% of full scale. Contact Honeywell Analytics for any additional data or details. **Standard temperature range for XNX EC Sensors is -20°C to +55°C. Extended temperature range for the XNX EC Sensors is -40°C to +65°C. Accuracy is ±30% of applied gas from -20°C to -40°C and +55°C to +65°C. Operating the XNX EC Sensors at extended temperature ranges for a prolonged time period exceeding 12 hours may cause deterioration in sensor performance and shorter sensor life.

***Contact Honeywell Analytics for availability. *Propane sensor with linear cross reference for Ethylene, n Butane and n Pentane.

Contact Honeywell Analytics for any additional data or details.

Ordering Information

Ordering Information

Standard Supply: The XNX universal transmitter is supplied complete with integral wall mounting lugs, 5 x M25 cable entries (ATEX/IECEx) or 5 x 3/4" NPT conduit entries (UL/CSA), Magnetic wand/screwdriver, Allen key, 3 x blanking plugs, quick start guide and manual CD. MPD or XNX EC sensors and cartridges are supplied fitted to the bottom entry if ordered. Other sensors are supplied separately. Default settings are configured according to specified personality type (mV, EC or IR) and selected output options. Each unit is 100% tested at the factory and supplied with a calibration and test certificate.

XNX-	Approval	Entry Type	Material	Personality	-	Option	Local HART	Sensor and Range

								IC1 IR Carbon Dioxide 0-5%Vol.

Example part number:

XNX-AMSV-NNCB1

XNX transmitter with HART® over 4-20mA output
ATEX/IEC approved
5 x M25 entries
painted 316 stainless steel
mV version
no output options
no local HART
Including MPD sensor. catalytic sensor 0-100%LEL.

NOTES

Certain combinations not available e.g. ATEX with ¾" NPT entries. Check price list for valid configurations.

Order sensors other than MPD separately and select 'NNN' for sensor and range.

*Pending

Shipping Details

Shipping Carton	L370mm (14.6") x W280mm (11") x D180mm (7.1").
Packed weight (Approx.)	Aluminium version 4.4kg (9.7lbs), stainless steel version 6.8kg (15lbs)

Optional Accessories

	Pipe Mount Kit	1226A0358	For use on pipes from 50-100mm (2-6 inches) in diameter. The kit includes: Pipe mount bracket, (2) carriage bolts, nuts and lock washers.	
	Remote EC Sensor Mounting Kit	SK3RMK	The remote sensor mounting kit (SK3RMK) allows the XNX EC sensors to be remotely mounted via an IS cable kit, up to 15 meters (50 feet) from the transmitter. The kit includes 15 meters of shielded cable, cable glands and remote terminal box. The cable can be cut to the required length and terminated at the remote terminal box.	
	Ceiling Mount Bracket Kit	1226A0355	The optional ceiling mount bracket kit allows XNX to be mounted to a ceiling. The kit includes: (2) stainless steel ceiling mount brackets, bolts and nuts.	
	Duct Mount Kit	3001A0408	The duct mounting kit (3001A0408) can be used with the EC sensor to allow detection of flammable O ₂ , CO, H ₂ and H ₂ S gases in ducts. When combined with the MPD interface adapter (1226A0382), the duct mounting kit can accommodate the MPD to detect flammable gases in a duct application. The duct mount kit includes the adapter, gasket and required fasteners. The MPD interface adapter includes only the adapter and requires the 3001A0408 duct mount kit.	
	MPD Interface Adapter	1226A0382		
	Calibration Gas Flow Adapter	S3KCAL	XNX EC	The calibration gas flow adapter is used to apply calibration test gas to the sensor. It push fills onto the bottom of the sensor and can be fitted without removing the weatherproof cover.
		02000-A-3120	MPD	
		02000-A-1645	Sensepoint	
		00780-A-0035	705	
	Weatherproof Cap	Included	XNX EC	The weatherproof cap protects the XNX sensors from harsh weather.
		02000-A-1640	MPD	
		02000-A-1640	Sensepoint	
		00780-A-2076	705	
	Collecting Cone	SPPGCC	XNX EC	The collecting cone improves detection of lighter-than-air gasses such as Hydrogen and Methane.
		02000-A-1642	MPD

	Remote Gassing Kit	1226A0354	The remote gassing kit enables gas to be applied remotely for performing functional response checks. Kit includes 50' Teflon® tubing, mounting bracket, tube cap and device adapters in ¼" and ½" ID to attach to bump test ports on the weatherproof cap of your device.	

Our Product Range

Fixed Gas Monitoring

Honeywell Analytics offers a wide range of fixed gas detection solutions for a diverse array of industries and applications including: Commercial properties, industrial applications, semiconductor manufacturers, energy plants and petrochemical sites.

- » Detection of flammable, oxygen and toxic gases (including exotics)
- » Innovative use of 4 core sensing technologies – paper tape, electrochemical cell, catalytic bead and infrared
- » Capability to detect down to Parts Per Billion (ppb) or Percent by Volume (%v/v)
- » Cost effective regulatory compliance solutions

Portable Gas Monitoring

When it comes to personal protection from gas hazards, Honeywell Analytics has a wide range of reliable solutions ideally suited for use in confined or enclosed spaces.

These include:

- » Detection of flammable, oxygen and toxic gases
- » Single gas personal monitors – worn by the individual
- » Multi-gas portable gas monitors – used for confined space entry and regulatory compliance
- » Multi-gas transportable monitors – used for temporary protection of area during site construction and maintenance activities

Technical Services

At Honeywell Analytics, we believe in the value of great service and customer care. Our key commitment is providing complete and total customer satisfaction. Here are just a few of the services we can offer:

- » Full technical support
- » Expert team on hand to answer questions and queries
- » Fully equipped workshops to ensure quick turnaround on repairs
- » Comprehensive service engineer network
- » Training on product use and maintenance
- » Mobile calibration service
- » Customised programmes of preventative/corrective maintenance
- » Extended warranties on products
